Making competent cells – C-Lab

24 April 2012

Re: Creation of competent strains of *E. coli* (DH5 alpha) at the De Waag.

To whom it may concern,

This declaration is in support of the legality of inducing competence in the DH5- α strain of *E. coli* at De Waag. It refers to guidance from the National Institute for Public Health and the Environment (RIVM).

Section 0. Background

De Waag is a non-profit, community run space in central Amsterdam. The BioClique, together with Bio workshops and Open Wetlab are do-it-yourself biologists, artists and enthusiasts who regularly meet at De Waag for series of public events. The group consists of both professional and amateur biologists.

Section 1. No genetic modification.

Current regulations apply to working with genetically modified organisms. We
