Pull Requests

Issues

GitHub Bootcamp

1

Set up Git

A quick guide to help you get started with Git.

2

Create repositories

Repositories are where you'll work and collaborate on projects.

3

Fork repositories

Forking creates a new, unique project from an existing one.

4

Work together

Send pull requests, follow friends. Star and watch projects.

You've been added to the **waagsociety** organization!

Here are some quick tips for a first-time organization member.

- Use the switch context button in the upper left corner of this page to switch between your personal context (**PieterVanBoheemen**) and organizations you are a member of.
- After you switch contexts you'll see an organization-focused dashboard that lists out organization repositories and activities.

Features of Github

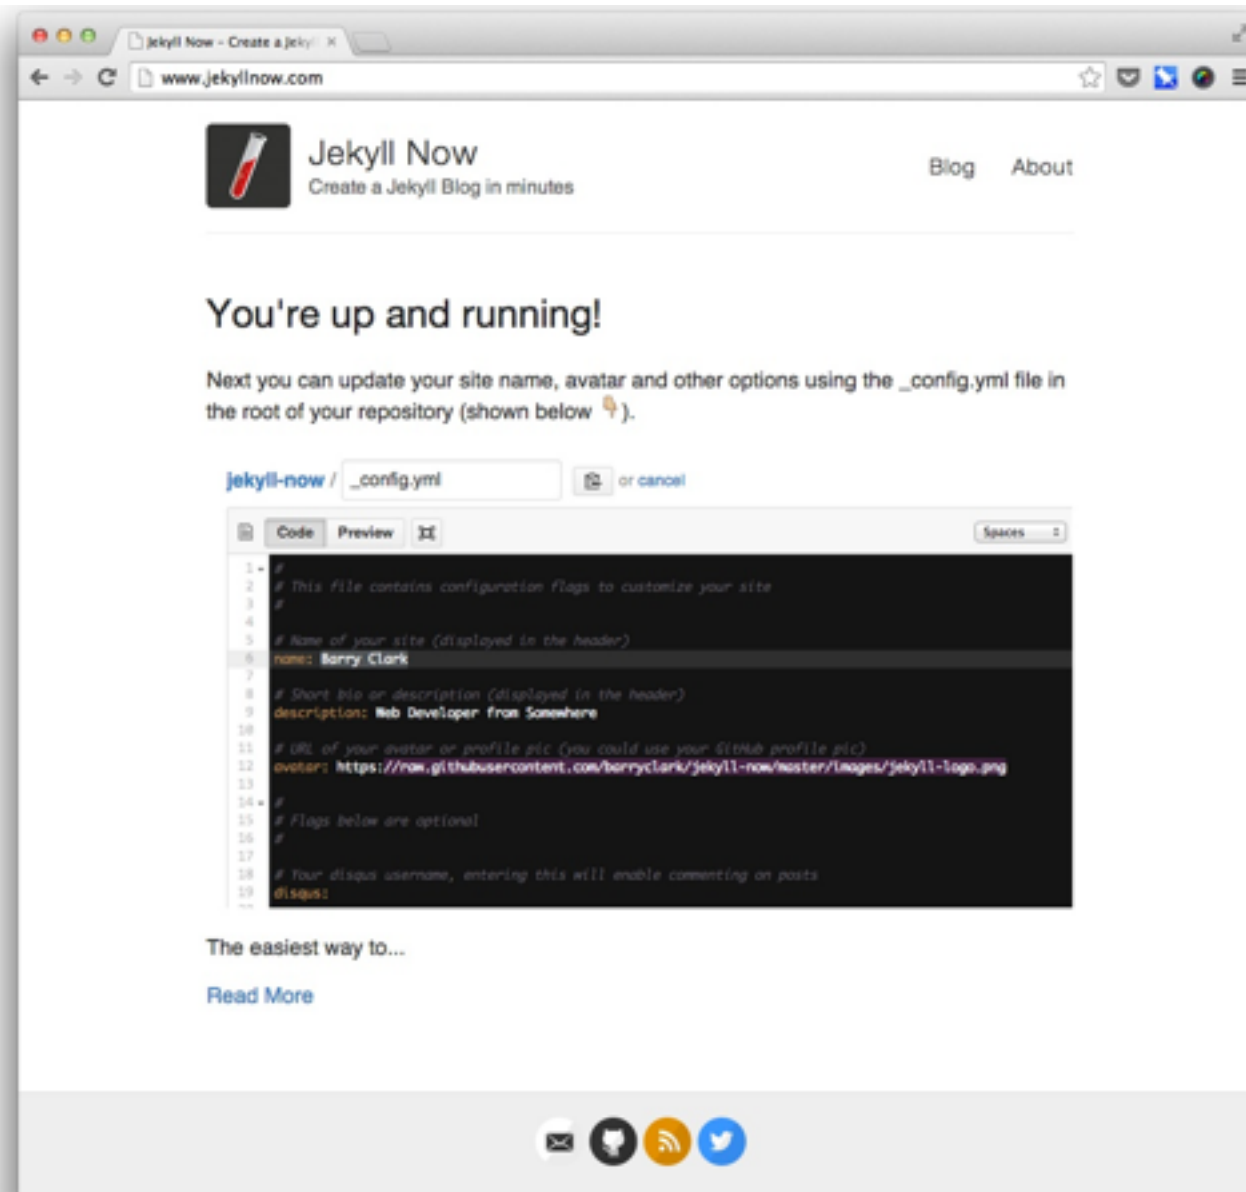

- Collaboration
- Version tracking
- Issue tracking
- Forking

Creating a Jekyll Github page

Jekyll allows you to create a „blog” type website on Github quickly

Follow this guide to get started:

<https://github.com/barryclark/jekyll-now>

Mark down language

Jekyll recognizes Mark Down language that you can use to layout your text

Mou

![Mou icon](http://mouapp.com/Mou_128.png)

Overview

Mou, the missing Markdown editor for *web developers*.

Syntax

Strong and Emphasize

strong or strong (Cmd + B)

emphasize or emphasize (Cmd + I)

**Sometimes I want a lot of text to be bold.
Like, seriously, a LOT of text**

Blockquotes

> Right angle brackets > are used for block quotes.

Links and Email

An email <example@example.com> link.

Simple inline link <http://chenluois.com>, another inline link [Smaller](http://smallerapp.com), one more inline link with title [Resize](http://resizesafari.com "a Safari extension").

A [reference style][id] link. Input id, then anywhere in the doc, define the link with corresponding id:

Join BioHack Academy group

Email your Github name to pieter@waag.org

The screenshot shows the GitHub interface for the BioHackAcademy repository. At the top, there's a search bar and navigation links like Explore, Gist, Blog, and Help. The repository name 'BioHackAcademy' is prominently displayed with its logo. Below the name, there's a search bar for repositories and a green button to '+ New repository'. The repository description reads 'BioHackAcademy.github.io' and 'f forked from PieterVanBoheemen/PieterVanBoheemen.github.io'. It also mentions 'Build a Jekyll blog in minutes, without touching the command line.' and 'Updated a minute ago'. On the right side, there's a sidebar with 'People' (listing PieterVanBoheemen) and 'Teams' (with a search bar 'Jump to a team').

In case you choose a different platform:
send me the link as well!
